

# Spool & Store Ribbon System

The **Best Craft™ Spool & Store System** makes it fast and easy to roll up your ribbon and then pull out just the amount you need from the compact dispensers.

Wind up to 4 yards of ribbon at a time with the Ribbon Spooler. Then keep your ribbons organized and dust-free in the Ribbon Dispensers. Each dispenser holds 6-12 rolls, depending on the width of your ribbons (max ¾" wide).

So simple and convenient to use...no more messy, bulky ribbon stash!

**1** Place a Divider Disc onto the post of the Ribbon Spooler. Take the end of your ribbon and slip it into the slot in the wheel of the Ribbon Spooler.

**2** Place your index finger on the end of the spool wheel and your thumb on the handle (over top the ribbon end) to create tension on the ribbon. Then turn the handle to wind up your ribbon.

**3** Once you have completely wound your ribbon, carefully remove the ribbon by sliding the Divider Disc off the post of the Ribbon Spooler.

**4** Now you're ready to insert the wound ribbon into one of the compartments in your Ribbon Dispenser. Be sure to leave a tail out to allow you to pull and dispense the length of ribbon you desire.

*Tip:* To prevent your ribbon ends from winding back into the dispenser, place a glue dot on the "tail" of each ribbon and press it onto the dispenser. When you want to use one of the ribbons, simply lift the ribbon end off the glue dot, cut the length you need, and reattach the end to the glue dot.
